1. **Status:** Please all the replies and correspondence should be addressed to Examiner's new art unit 2629. Receipt is acknowledged of papers submitted 05-16-2006 under request for reconsideration which, have been placed of record in the file. Claims 2,7,13-17,19 and 22 are pending in this office action. Claims 1, 3-6,8-12,18, 20 and 21 are cancelled

***Response to Amendment***

2. Applicant has cancelled claims 1, 3-6,8-12,18, 20 and 21. Applicant has amended dependent claims 2,7,13-17,19 to change their dependency to independent claim 22. Applicant has amended independent claim 22 per telephone interview with examiner. Applicant's arguments, see Remark, filed 05-16-2006, with respect to Claim 22 regarding "a display panel, wherein the display panel is selected from a the group consisting of an organic light-emitting diode panel, a plasma display panel, a liquid crystal display panel and a cathode ray tube screen display; and a touch control panel over the display panel, the touch control panel comprising-the transparent substrate and the contact layer are capable of resisting ultra-violet rays such that intensity of the ultra-violet rays after passing through the touch control panel is substantially reduced, and wherein material constituting the contact layer is selected from the group consisting of polymer resin, polyester glass and glass with transparent electrode therein. " have been fully considered, searched and are persuasive as they do overcome prior art rejection, which puts application number 10065183 in condition for allowance.

3. Claims 2,7,13-17,19 and 22 are allowed.

Art Unit: 2629

4. The following is an examiner's statement of reasons for allowance:

Applicant has amended independent claim 22 as per telephone interview with examiner to overcome prior art rejection. Applicant's argument filed on 11-29-2005, and 05-16-2006, are convincing. As argued by applicant in remarks under claim rejection 1-29-2005, on pages 7-9, and 05-16-2006, page 5, paragraph 1-3, the prior art of Kinoshita et al. (6,300,594 B1) in view of Abileah (20030222857 A1); Wang et al. (US 2003/0048597 A1); Aufderheide et al. (6,587,097 B1) and Arai Susumu (JP 09-052964) fails to recite or disclose the uniquely distinct features represented by underlined bold claim below;

**a display panel, wherein the display panel is selected from a the group consisting of an organic light-emitting diode panel, a plasma display panel, a liquid crystal display panel and a cathode ray tube screen display; and a touch control panel over the display panel, the touch control panel comprising the transparent substrate and the contact layer are capable of resisting ultra – violet rays such that intensity of the ultra-violet rays after passing through the touch control panel is substantially reduced, and wherein material constituting the contact layer is selected from the group consisting of polymer resin, polyester glass and glass with transparent electrode therein.**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
